

GOLDSCHMIDT

Smart Rail Solutions

GLUED INSULATED RAIL JOINT

EXTENDED JOINT LIFE WITH GUARANTEED

PERFORMANCE IN THE MOST DEMANDING CONDITIONS

Achieve the highest quality and guaranteed performance with Australia's locally manufactured Glued Insulated Rail Joints. Solutions available for all rail types.

TECHNICAL DATA

DIFFERENT SOLUTIONS

- Thermabond – locally assembled and ready to be welded into track. Produced for all Australian rail profiles and grades, with additional optional improvements such as rail end hardening, cold bolt hole expansion treatment, swage fastenings
- MT – for quick in-situ installation and suitable for all rail types
- ETW 1 – for maximum durability and most demanding requirements, factory assembled for best results
- ETW 2 – with the highest durability and available for use after 1 hour of installation in situ

BENEFITS

- Used worldwide under a range of track conditions (axle loading, train speed and climates)
- Hardening and tempering process applied to rail ends for running surface hardness in excess of 320HBW
- Approved and installed in over 50 countries
- Supplied with High Tensile bolts or swage fasteners
- Successfully tested against various international, national and local specifications
- Cold Bore Expansion of rail bolt holes available for factory manufactured joints
- Extremely durable, quick installation with a high-quality glue bond
- Locally manufactured in accordance with AS1085.12-2002 conforming to ISO 9001 standards
